External Word Clock Card from Hear Technologies
Automatically detect sampling rates and incoming word clock

April 30, 2018

Huntsville, AL - Hear Technologies has added a new card option to its lineup. With the capability to work with both the Hear Back PRO Hub and the Waves SG Bridge, the Word Clock Card gives engineers a no-hassle solution to ensure their system clock is precise.

The Word Clock Card has both input and output BNC connections, making for a flexible and easy-to-use solution. It supports 44.1k, 48k, 88.2k, 96k, 176.4k, and 192k sampling rates.

Using a precision PLL circuit, the Word Clock Card automatically detects sampling rate and locks onto incoming word clock. This newest card to the Hear Technologies family will also work in conjunction with any of the Hear Back PRO and Waves SG Bridge I/O cards.

About Hear Technologies

Hear Technologies offers unique and affordable solutions for personal and professional monitoring systems. We provide options for everyone – from beginners to seasoned pros. Our digital solutions give everyone the mix they need to perform their best. We design our products with the user in mind, so Hear gear is easy to use right out of the box, while providing the best sound in the business. Whether or not you've used a personal monitor mixer, the straightforward layouts of our powerful systems make getting the right mix a quick and effortless experience. Hear Technologies sets the bar high for quality sound, breaking new ground in the market to provide our customers with peak pro audio performance.
