

Hear Technologies Introduces the Hear Back PRO Virtual Mixer

All the features of the Hear Back PRO Mixer in a small card

April 12, 2017

Huntsville, AL - Hear Technologies announce the release of the Hear Back PRO Virtual Mixer. It boasts all the features of the Hear Back PRO Mixer in a small card format.

The small card format of the new Hear Back PRO Virtual Mixer allows it to fit into the Hear Back PRO Hub. The Hub can be populated with up to four Virtual Mixer cards, and an unlimited number of Hubs can be connected together for larger systems.

Controlling the Virtual Mixer is easy using the new Hear Back PRO iOS app on any iOS device or even another Hear Back PRO Mixer. This key feature is great for controlling wireless in-ear monitor or standard stage monitor mixes. The app also allows the user to easily drag and drop which iOS devices and Hear Back PRO mixers control each Virtual Mixer.

The PAIRING button (and LED indicator) makes it easy to configure which iOS device or Hear Back PRO Mixer(s) will be controlling each Virtual Mixer.

The Virtual Mixer provides all the functionality of the Hear Back PRO mixer to your monitor setup and control from the palm of your hand with the new Hear Back PRO iOS app.

About Hear Technologies

Hear Technologies offers unique and affordable solutions for personal and professional monitoring systems. We provide options for everyone – from beginners to seasoned pros. Our digital solutions give everyone the mix they need to perform their best. We design our products with the user in mind, so Hear gear is easy to use right out of the box, while providing the best sound in the business. Whether or not you've used a personal monitor mixer, the straightforward layouts of our powerful systems make getting the right mix a quick and effortless experience. Hear Technologies sets the bar high for quality sound, breaking new ground in the market to provide our customers with peak pro audio performance.
